

JEFFERSON EXPRESS

“Bringing Professional Training And Development To You”

Join Jefferson Community College for the launch of Jefferson Express on January 11th!

The Continuing Education Division at Jefferson Community College would like to invite you to the unveiling of their new mobile computer lab - Jefferson Express. Please join us, with our community partners, The Workplace and Small Business Development Center, for our launch in Jefferson County on **January 11, 2011 at 4:00pm** at the North Side Improvement League in Watertown.

Jefferson Express is a mobile computer lab that will deliver non-credit training to rural communities within Jefferson and Lewis Counties. Training will serve small business owners, employees, job seekers, underemployed, senior citizens, teens and kids. Training is mobile so we can come to you by partnering with libraries, community agencies, and businesses. Some examples of workshops will include resume creation, basic computer skills, and small business related topics - all to help promote digital literacy and self-sufficiency using technology and the Internet.

The event will provide additional information on the benefits of the Jefferson Express program, and how its services will positively impact our community. Light refreshments will be provided, and the opportunity for questions will be answered by the Continuing Education staff. We look forward to celebrating the launch of this exciting endeavor with you on January 11th!

North Side Improvement League

633 Mill Street

Watertown, NY

Tuesday January 11th

4:00pm

Kindly RSVP by Wednesday January 5 to abates@sunyjefferson.edu or 315.786.6591

BROADBANDUSA
CONNECTING AMERICA'S COMMUNITIES

The New York State Library, a unit of the Office of Cultural Education within the New York State Education Department (NYSED), has been awarded \$9.5 million in a grant from the US Department of Commerce National Telecommunications and Information Administration (NTIA) to expand computer access in public libraries across New York State. The funding is being provided through the American Reinvestment and Recovery Act (AARA) Broadband Technology Opportunity Program (BTOP) award.
