

- Applications** Designed to interact with **Facebook** and include engaging games and useful features like Events and Photos. Most applications are built by outside developers and allow you to play games with your friends, remember friends' birthdays, share your taste in movies, send gifts to friends, and more. Applications can also access your **Profile** information.
- Chat** See which friends are online by clicking the  **Chat** menu at the bottom right of any Facebook page. A green dot appears next to a friend who is online and available to chat, and a moon appears next to a friend who is currently idle. Click a friend's name to send an instant Chat message. Note: you can only Chat with your confirmed **Friends** using Facebook Chat.
- Events** Facebook allows users to create  **Events** - such as parties, lectures, political rallies, group meetings, etc. - and invite other users (guests), who can RSVP online. Events can be "open" or "closed" to control who can add themselves to the guest list. You can also send messages directed to Event guests or attendees.
- Friends** A mutually-confirmed connection.  **Friends** can comment on your photos, profile, send messages and are notified of any changes to your profile.
- Groups** A shared space that allows members to selectively share information with a small group of **Friends**.  **Create Group...** to post photos, **Chat** with multiple members of the group, collectively write and edit **Notes**, and subscribe to notifications or emails about any posts to the group.
- Messages** Your Facebook email. Messages are private between Facebook members. Click  **Messages** to view your inbox, sent messages or compose a message.
- Network** Groups of Facebook users to which you belong based on your employer, educational institution, or geographic region.
- Notes** For more extensive writing, kind of like a blog. You can **Tag** friends in your note. Other users can comment on your Notes or share them with Friends.
- Newsfeed** A feed of changes to your profile and recent activity is broadcast to your community of Friends. The News Feed is the first page encountered upon entering Facebook.

- Pages** The ability to **Like** a page based on common interests, political affiliation, academic major, or any other criteria. Pages range from the serious (“Action to Save Darfur and Stop Genocide,” 8,060 people like this) to the less so (“When I Was Your Age, Pluto Was a Planet,” 57,458 people like this).
- Privacy Settings** Adjust these settings to control which people and applications can see your information. You can control who can see your basic information, who can see the content you share including photos, how your information is shared externally with websites or applications and blocking specific and applications from accessing your information.
- Profile** Your facebook homepage where users can view your information, posts, and interact with you. You can limit who views your profile by changing your **Privacy Settings** and add functions such as **Applications**.
- Share** This feature allows you to  links to websites, blogs, music and video clips, etc. on Facebook. Posted items are available to anyone who views your **Profile** or via the **News Feed**. Facebook users can comment on posted items or share them with other **Friends**.
- Wall** Your public messaging space that appears on your profile. **Friends** can write and post on your wall. All visitors can view your wall/profile unless you adjust your **Privacy Settings**. You can delete comments or posts from your own wall.
